Machine Learning

Volume 47, No. 1, April 2002

Special Issue: Unsupervised Learning
Guest Editor: Douglas H. Fisher

Editorial ................................................................. Doug Fisher 5

Maximum Likelihood Estimation of Mixture Densities for Binned and Truncated Multivariate Data ............................................................ Igor V. Cadez, Padhraic Smyth, Geoff J. McLachlan and Christine E. McLaren 7

A New Nonparametric Pairwise Clustering Algorithm Based on Iterative Estimation of Distance Profiles ................................................... Shlomo Dubnov, Ran El-Yaniv, Yoram Gdalyahu, Elad Schneidman, Naftali Tishby and Golan Yona 35

Learning Recursive Bayesian Multinets for Data Clustering by Means of Constructive Induction ......................................................... J. M. Peña, J. A. Lozano and P. Larrañaga 63

Bayesian Clustering by Dynamics ................................................ Marco Ramoni, Paola Sebastiani and Paul Cohen 91
