AMSI Summer School 2016
Linear Control Theory & Structured Markov Chains
Prepared by Yoni Nazarathy.

Guidelines for Final (Take Home) Exam

• The take home exam questions will be posted on the course web-page on 8am (Melbourne time) Thursday, February 4.

• There is a total of 36 hours for completing the exam: Answers should be sent to y.nazarathy@uq.edu.au by no later than 8pm (Melbourne time) Friday February 5.

• A scan/photo of the answers should be sent in. Students may also wish to typeset their answers (but this is not mandatory). Answers should clear and legible. Please make sure that the content of the answers e-mail does not exceed 3MB (process the images).

• Students taking the exam are not allowed to communicate with peer students or other academic experts about the exam questions until they have handed in their solution.

• Yoni Nazarathy will be available through e-mail/phone-text (0499-028-705) to answer questions about the exam until 12PM (noon), Friday February 5 with a response time of up to 4 hours.

• During the week following the exam, students may be contacted (phone/e-mail) and be questioned about their solution. This is mostly to see that the work is solely theirs.

• Any material and computing resource can be used during the exam.
